# Quarterly amount of dried marijuana produced for medical purposes in Canada between April 2015 and September 2018 (in kilograms)

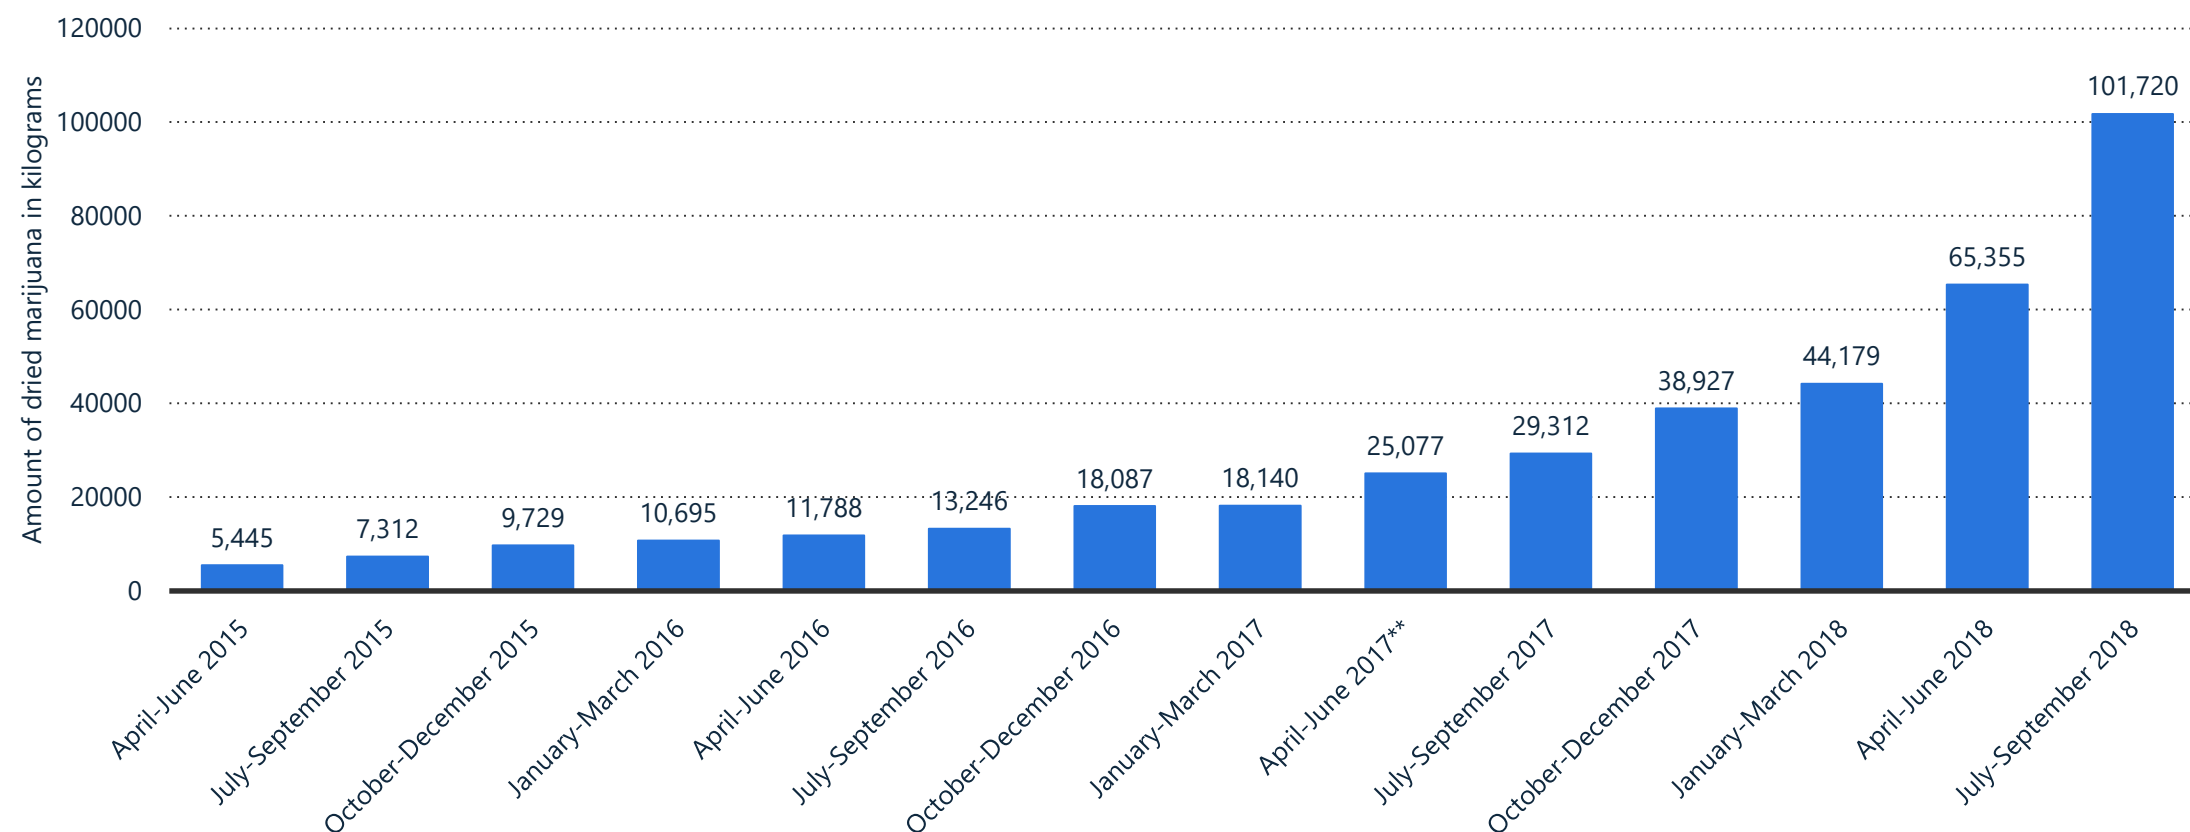

Amount of Canadian cannabis produced for medical purposes by quarter 2015-2018

## Source and methodology information

Source(s)	Health Canada
Conducted by	Health Canada
Survey period	April 1, 2015 to September 30, 2018
Region(s)	Canada
Number of respondents	<i>n.a.</i>
Age group	<i>n.a.</i>
Special characteristics	<i>n.a.</i>
Published by	Health Canada
Publication date	March 2019
Original source	<a href="https://canada.ca/en/health-canada">canada.ca/en/health-canada</a>
Website URL	<a href="#">visit the website</a>

## Notes:

Amount produced "refers to the amount of dried marijuana produced that was tested, approved, and ready for sale during each quarter (expressed in kg of dried marijuana)." \* This refers to the amount of dried marijuana that was made available for sale to registered clients during each month (expressed in kg of dried marijuana). Production data was reported in this manner starting in October 2016.

Publication date	March 2019
Original source	<a href="https://canada.ca/en/health-canada">canada.ca/en/health-canada</a>
Website URL	<a href="#">visit the website</a>

## Notes:

\* Changes in inventories may be a result of amounts of dried marijuana sold, produced, destroyed and imported. Inventory refers to all dried marijuana held in stock at the end of each month. This may include dried marijuana that: (1) is intended for sale, but has not yet been tested/approved; (2) is approved for sale (has been tested and is ready for sale); (3) is intended for extraction activities; or (4) is being held as samples. \*\* From this quarter: inventories as of end of quarter.
